Welcome on my Homepage

On this pages you will find informations about radio equipment that I have developed. Some are available as kit or ready-made unit. You can download data sheets or construction manuals of most of them.

Receiver for Weather Satellites with Antenna diversity R2FX

Now available: [Turnstile Antenna](#) for 137MHz for 69,- Euro

At Jan. 4th, 2006 NOAA 18 has changed its transmit frequency from 137.100 to 137.9125 MHz. On the newer receivers this frequency is on channel 1. For the older modells you will find a little program [here](#) that configures the R2FX.
